

A.N.T. Audio U04103-70A Combination Setup Tape.

Specifications:

Tape speed	4.76 cm/sec \pm 0.3%
Recording length	~15 min 30 sec (C30 cassette)
Section 1 - 60 seconds PB level setup	400Hz, 0dB =200nWb/m \pm 0.5 dB ANSI ("Dolby Level")
Section 2 - 60 seconds Azimuth setup, FR check	10kHz -12dB \pm 1 dB
Section 3 - 60 seconds FR check	400Hz -12dB \pm 1 dB
Section 4 - approx. 750 sec FR, W&F check, Speed setup	3000Hz -12dB \pm 1 dB
Track configuration	Full track
EQ	70us , IEC(Prague) 1981

Notes:

- Before using this alignment tape make sure that the cassette deck is in a good mechanical order and that the heads were demagnetized using a proper AC demagnetizer. This will extend the life of the tape and keep it within the specs longer.
- Store the tape well away from strong magnetic fields (i.e. permanent magnets, AC transformers and chokes, electric motors etc.) in a dry place at 15-25 °C.
